

PRESTAN

Introducing the Prestan Professional Manikin – guaranteed to be the future of CPR/AED training manikins!

Realistic to the eye and the touch, the Prestan manikin is unlike any other on the market. Available individually or in convenient multi-packs of four for class training purposes, our manikins are uniquely designed as a clamshell that accommodates an easy-to-insert face shield lung bag.

Prestan's revolutionary new CPR Rate Monitor allows for instant feedback to both instructor and student regarding the rate of chest compression. This allows each student to gauge their rate of compressions on their own as well as allowing the instructor to monitor several students quickly and easily.

And with our patented face/head tilt, the Prestan manikin simulates the way an actual victim's head would move if he required CPR. In addition, the unique construction of our manikins incorporates a mechanism to help them use the correct force to compress the chest to the correct depth.

- Realistic looking and acting manikin is more acceptable to both instructors and students.
- Far easier and faster for you to carry and set up at training sites.
- Easy-to-insert face shield lung bag speeds setup of the manikin.
- Face shield is secured so it won't slip and there's no need for adhesives.
- Gives each student a realistic experience that provides for the best "real life" CPR outcomes.
- Allows each student to observe a true chest rise
- Full chest rise and lung bag ensures that students receive the most accurate and realistic training.
- Helps students take CPR learning experience seriously.
- Face/head tilt enhances the CPR learning experience and teaches students how to open the airway during CPR.
- Clicker mechanism increases student's confidence in administering adequate compressions.
